AtliQ Review

A second reader for every contract AtliQ signs

Sampath Karupakula, AI Product Manager · Stakeholder presentation · 17 Oct 2026

THE PROBLEM

One person reads every contract

27 h

CEO hours a month on contract review, mostly after 10 pm

$650k

in 7 deals waiting on him on 22 September

$23,200

lost on one clause signed on a phone in 4 minutes

7 of 15

new drafts clash with a promise AtliQ already signed

Careful means slow. Rushed means unsafe.

TWO STORIES FROM THE DATASET

Slow when careful, unsafe when rushed

RUSHED

Brightwater, Nov 2025

Signed on a phone at the airport after 4 minutes 12 seconds. The contract had an uncapped delay penalty, no exclusion for client-caused delay, and English law.

Cost: $9,000 settlement + $14,200 legal fees

SLOW AND BLIND

ShopSwift and Gulf Crown, 2026

ShopSwift waited 9 days in the queue and the client’s budget slipped a quarter. Gulf Crown, the year’s biggest deal, nearly broke Al Noor’s Gulf non-compete.

Finding the Al Noor contract took 20 minutes

WHO WE LISTENED TO

Two users, one missing list

THE SIGNER · KARANDEEP, CEO

“I don’t have a list. I’d have to open each one.”

- Decide about 9 contracts a month, on time
- Never break a promise already signed
- 30 minutes or less per review

THE DEAL OWNERS · BHAVIN, DHAVAL, JAY

“Is there a list of what we’ve agreed not to do?”

- See the queue and every deadline
- Check an offer before a client call
- Take first reviews off the CEO

Source: two client meetings, the AtliQ dataset, user research (D1)

THE ROOT CAUSE

AtliQ has no record of what it has promised.

So every review starts from memory, and every contract signed adds one more promise for the next review to remember.

WHERE AI FITS

Ten steps, AI leads at two of them

1. Draft arrives
AI-assisted

2. Queue
No AI
Most painful

3. Related documents
AI-assisted

4. Read the contract
AI-led
Most painful

5. Usual terms
AI-assisted

6. Past promises
AI-led
Most painful

7. Company, law, value
Rules and maths

8. Counsel
AI-assisted

9. Negotiate
AI-assisted

10. Sign or reject
People only

The red-dot vote put Steps 6, 4 and 2 first. Step 2 is solved with plain software, not AI.

THE SOLUTION

It reads and checks. People decide.

Reads every clause

Every clause of every version, explained in plain English: what it means, what it could cost and how to soften it.

Checks past promises

A register built from AtliQ's signed contracts. Every new draft is checked against it, even when the words differ.

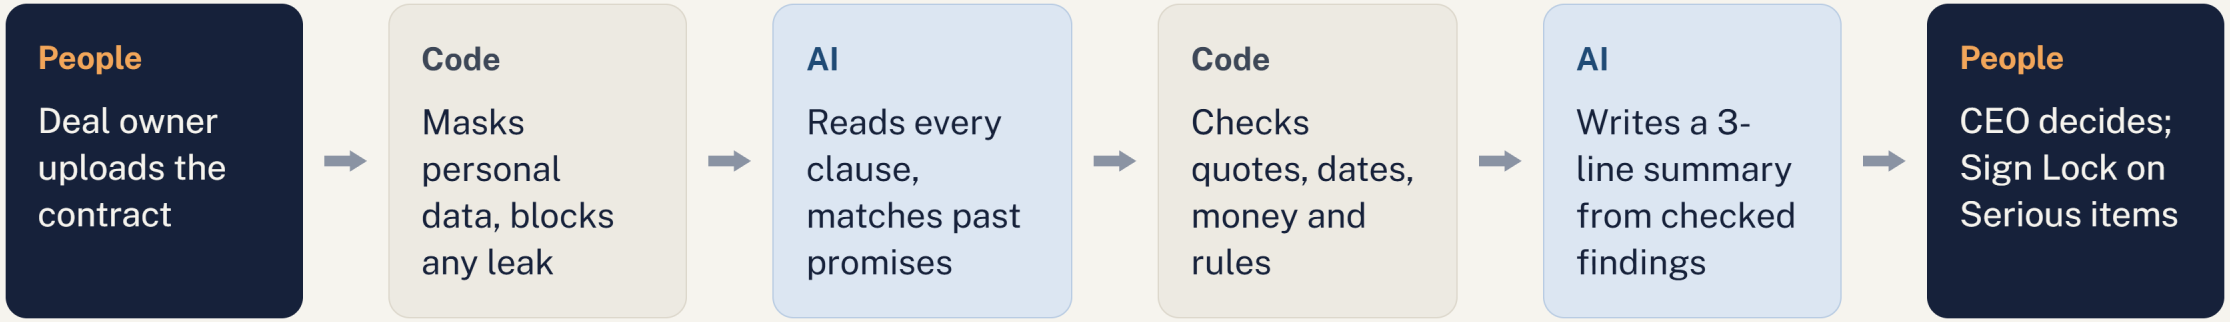

Locks risky decisions

Sign Lock holds while a Serious item is open. The tool never signs, sends or edits a contract.

Report in under 5 minutes **Every quote verified word for word** **About $0.10 a review**

HOW IT WORKS

AI reads, code checks, people decide

AI does

Extract terms, match meaning across contracts, explain each risk, write the summary

Code does

Masking, dates, every dollar figure, company and law rules, quote checks, the score

People do

Confirm promises, dismiss with a reason, approve pushback, sign or reject

WHAT THE CEO SEES

Gulf Crown: a clash caught in time

SERIOUS CLASH

Gulf Crown §4.1 · new

“revenue management… nine Properties… Kingdom of Saudi Arabia”

Al Noor §12.1 · signed

“revenue-management services to any Hospitality Business in the GCC”

Almost no shared words, the same restriction. Live until 14 Sep 2029. The Seaside waiver does not cover this deal.

LAKESHORE · SERIOUS CLASH

$72/hr for a senior role, while Crestline was promised AtliQ’s best price until Jul 2027.

HARRINGTON · SERIOUS

2% of $210k a day, no cap: $4,200 a day, the full fee gone in 50 days.

SUNRISE SOW-2 · LOW, NO ACTION

“Penalty for Delay” matches AtliQ’s own standard terms, so the report stays calm.

TRUST BY DESIGN

Six guardrails, each with an owner

Missed past promise — Pranav and PM

Every relevant promise goes to the AI; each report says how many contracts it checked.

Made-up quote — Pranav

Code checks every quote word for word; anything unverified goes to “Not sure”.

Client data exposed — Pranav

Names and IDs masked before every AI call; a leak check blocks the call.

Too many alarms — PM

Serious only when verified and permanent, unlimited or a live clash; dismissals need a reason.

AI acting on its own — PM

No sign, send or edit features exist; suggested wording is copy only.

Blind trust — Karandeep and PM

Sign Lock, a “Not sure” list, and a month in shadow mode before anyone relies on it.

TESTED BEFORE LAUNCH

The prototype meets the launch gate

53 / 56

Planted risks found (95%) across 50 test contracts and 7 dataset cases

Gate: 95% or more, every Serious item shown

290 / 290

Quotes found word for word in the contract

Gate: 100%

0

Must-not mistakes: invented caps, expired promises shown as live, clean contracts flagged

Gate: zero

$0.10

About this much per review on the prototype

Gate: under $0.30

Two near misses to fix before shadow mode ends: TC17 (a clash rated Not sure) and TC42 (right gap, wrong quote).

HOW WE WILL KNOW IT WORKED

North Star: safe, on-time decisions

At least 90% of contracts decided by the client's deadline, with zero serious risks found after signing.

30 min
or less of CEO time per review, down from about 2 hours

18 h
of CEO time freed every month

0
deals lost to the review queue

80%+
of Serious flags confirmed real by the CEO

COST AND VALUE

$6 of AI a month saves $1,134

Per month	Today	With AtliQ Review
CEO review time	$1,350	$450
Outside counsel	$480	$240
AI and hosting	$0	$5.83
Total	$1,830	$696

CEO time at $50 an hour, 18 reviews a month, 30 minutes each with the tool. AI priced at $0.30 a review (the high-accuracy planning figure).

62%

less spent on review: $13,610 a year

Under 1 day

to pay back the $6.91 one-off setup

357 years

of AI cost equals one Brightwater

Source: AtliQ_Cost_Estimation_v2.xlsx (D4)

THE PLAN

Trust is earned in stages

Oct 2026 · done

Prototype

Tested on 15 real drafts and 50 test contracts

Gate: 95% caught, every quote verified

Nov 2026

Shadow mode

Karandeep reviews as today and reads the report alongside

Gate: zero serious misses for a month

Dec 2026

Closed beta

Report first; founders take first reviews

Gate: 90% decided on time, 30 of 30 contracts on file

Jan 2027

Full use

Every client and partner contract goes through it

Gate: metrics hold for a quarter

Kill switch: back to manual review if a serious risk is missed, a quote is not in the contract, personal data reaches the AI, or Serious flags confirmed real fall below 80% for two weeks.

WHAT WE NEED FROM YOU

Five decisions to start in November

1. Confirm the Serious rule: permanent harm, unlimited cost or a live clash
2. Upload the 13 signed contracts missing from the register
3. Agree how long contracts are kept (proposal: life of the deal plus 3 years)
4. Approve the hosting region and AI provider terms for real contracts
5. Start the shadow month in November, with Karandeep reviewing alongside

Thank you. Questions?
